“...This has given me the proper fundamental tools to create and adapt websites for my own personal business. ...”

Teresa Ortigao, Google review 5 stars
Ideal for complete beginners, to design and build real websites.

Web Courses Bangkok's mission is to help you, as beginner, feel calm, confident and cheeful about building exciting online stories.

This course will help you look at the different components that make up a website and know what to think about when planning a website so you can accurately and confidently plan for future projects.

Use wireframes and sitemaps using www.moquups.com -- fast to setup and easy to learn, to plan out web projects so you can be sure every aspect of the website design is in place.

Learn about Hypertext Markup Language (HTML) -- the global standard language for displaying content on the internet -- and how to use HTML perfectly in Sublime Editor so it is easier to learn and reduces the risk of errors when you build websites in the future.

Experiment with Cascading Style Sheets (CSS) -- the global standard language used to apply fonts, colours, borders, and effects to a document written in HTML -- so you can bring your website design to life and learn how to take it live.

Going live! - yes you will be able to put your first website live on the internet. While it may not win any design awards it will complet the story of your essentials training from 0 to starting our as a web designer.
Create a workable website to suit your brand

Nice & beautiful handcrafted with mockups and scene generators

Greatest collection of perfect quality graphics for your creative projects

Awesome & unique animated mockups that breathe life into your projects

Pixel-perfect design "speaks louder than words"
Hands-on training so you feel comfortable in the world of creating quality websites.

- Look at the whole process of web design from start to finish.
- Feel extremely comfortable and confident using clean HTML code.
- Turn code into visually appealing designs using CSS and take a website live.

We believe your success is our success.
Our instructors are industry experts who have a wide range of professional experience, and up-to-date knowledge of software and workplace practices.

Turn theory into knowledge as you learn to create websites, write HTML, CSS, use Wordpress. Our aim is to support your learning goals with hands-on industry training, career advice, and ongoing support and guidance.

Our classes are intentionally designed to be interactive and practical, so that you feel confident to share ideas as well as independently create your own designs.

You will receive additional resources such as class projects, worksheets, and online help, so you always feel supported and encouraged as you learn.

Our courses are constantly reevaluated and developed to give students the most relevant, up-to-date knowledge and skills. We want you to feel confident and prepared to take your first steps in a new direction—both personally and professionally.
