"Was such a pleasure to learn new tips everyday with such good teachers"

Alexandre Deplancke, Facebook
Make your UX/UI from inspiration to reality.

The field of UX/UI can be challenging and complex. Knowing how and where to take your first steps to create digital interactions from scratch starts here.

Find your way around Adobe XD’s tools and understand how to use the program just like a UX/UI professional would so you feel at ease to use the program.

Learn how to use Adobe XD to build and test a full mobile app and website design; build wireframes and prototypes; work with fonts and colour; use and design style guides for brands; so you can confidently conduct UX/UI design for yourself or a client.

Know how to correctly prepare designs for developers and designers to use so you can work as a real professional UX/UI design on a team in the future.
Create User Interfaces for websites and apps.
Enter the world of UX/UI design to create effective and tangible user interactions.

- Use Adobe XD for a variety of tasks such as designing and prototyping apps and web pages.
- Create an e-commerce, blog, or small business website with your customers in mind.
- Learn the essentials of UX/UI design and how to apply these concepts to your own projects or business.
- Take your design from a concept to a working prototype with Adobe XD
Our instructors are industry experts who have a wide range of professional experience, and up-to-date knowledge of software and workplace practices.

Turn theory into knowledge as you learn to design and create engaging interfaces, user-centric interactions, customer journeys, apps and more. Our aim is to support your learning goals with hands-on industry training, career advice, and ongoing support and guidance.

Our classes are intentionally designed to be interactive and practical, so that you feel confident to share ideas as well as independently create your own designs.

You will receive additional resources such as class projects, worksheets, and online help, so you always feel supported and encouraged as you learn.

Our courses are constantly reevaluated and developed to give students the most relevant, up-to-date knowledge and skills. We want you to feel confident and prepared to take your first steps in a new direction—both personally and professionally.

Our teaching philosophy

We want you to feel confident and prepared to take your first steps in a new direction—both personally and professionally.

**Personalised learning system**
We design our courses using the 4MAT Model, which approaches learning in a holistic way combining the left-brain and right-brain, so you will learn topics and skills in a unique way that enables you to use them in the real-world with confidence.

**Practical**
We show you how to use industry-specific tools and programs, so you get lots and lots of practice and feel confident to use them independently.

**Real-world applications**
Our industry expert instructors are with you every step of the way, providing guidance through problem-solving and sharing valuable real world experiences.

**Friendly**
Our industry expert instructors create a relaxed and friendly atmosphere, so you feel comfortable, have fun, and enjoy participating.
Here’s what you’ll be able to do after the course*

Create interface
Using UX and UI skills to create interfaces for both mobile and desktop

Interactive prototype
Create fun interactive prototypes to show to clients, team members and developers.

Prepare for developers
Know how to prepare your designs for developers and other designers to use.
