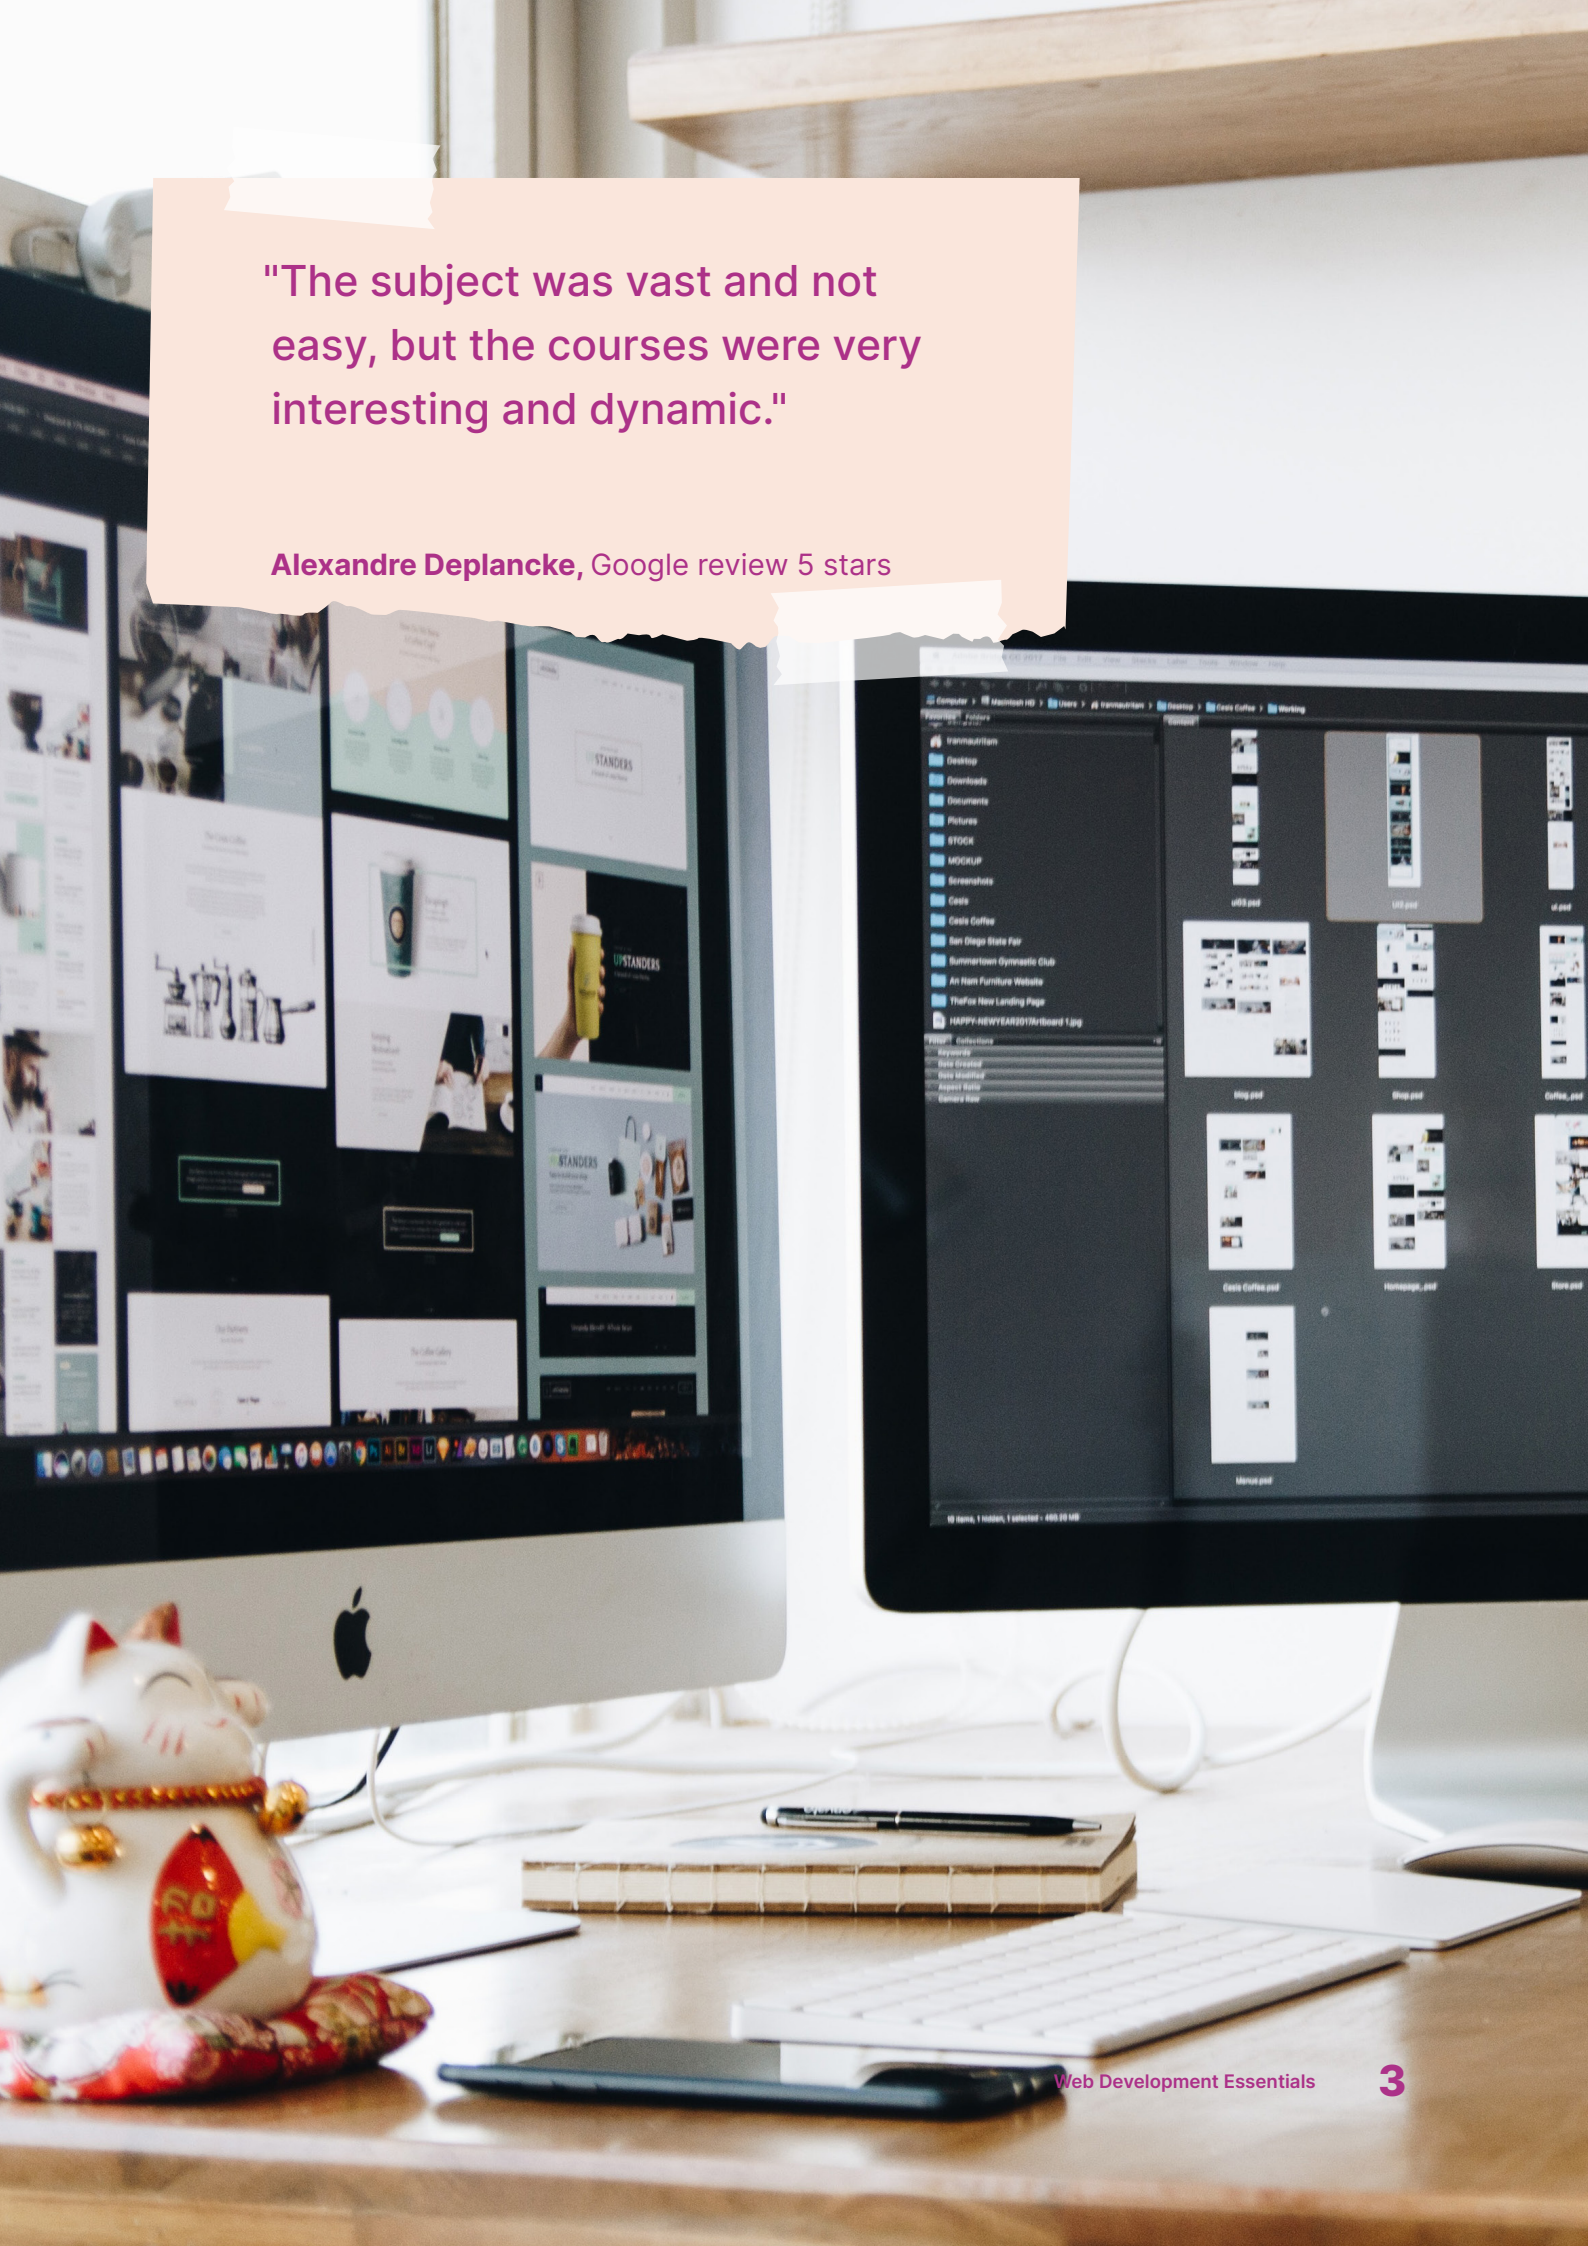
How to apply	Email info@webcoursesbangkok to find out the next available course date.



"The subject was vast and not easy, but the courses were very interesting and dynamic."

Alexandre Deplancke, Google review 5 stars

Web development gives you the opportunity to solve real life problems in a creative way.

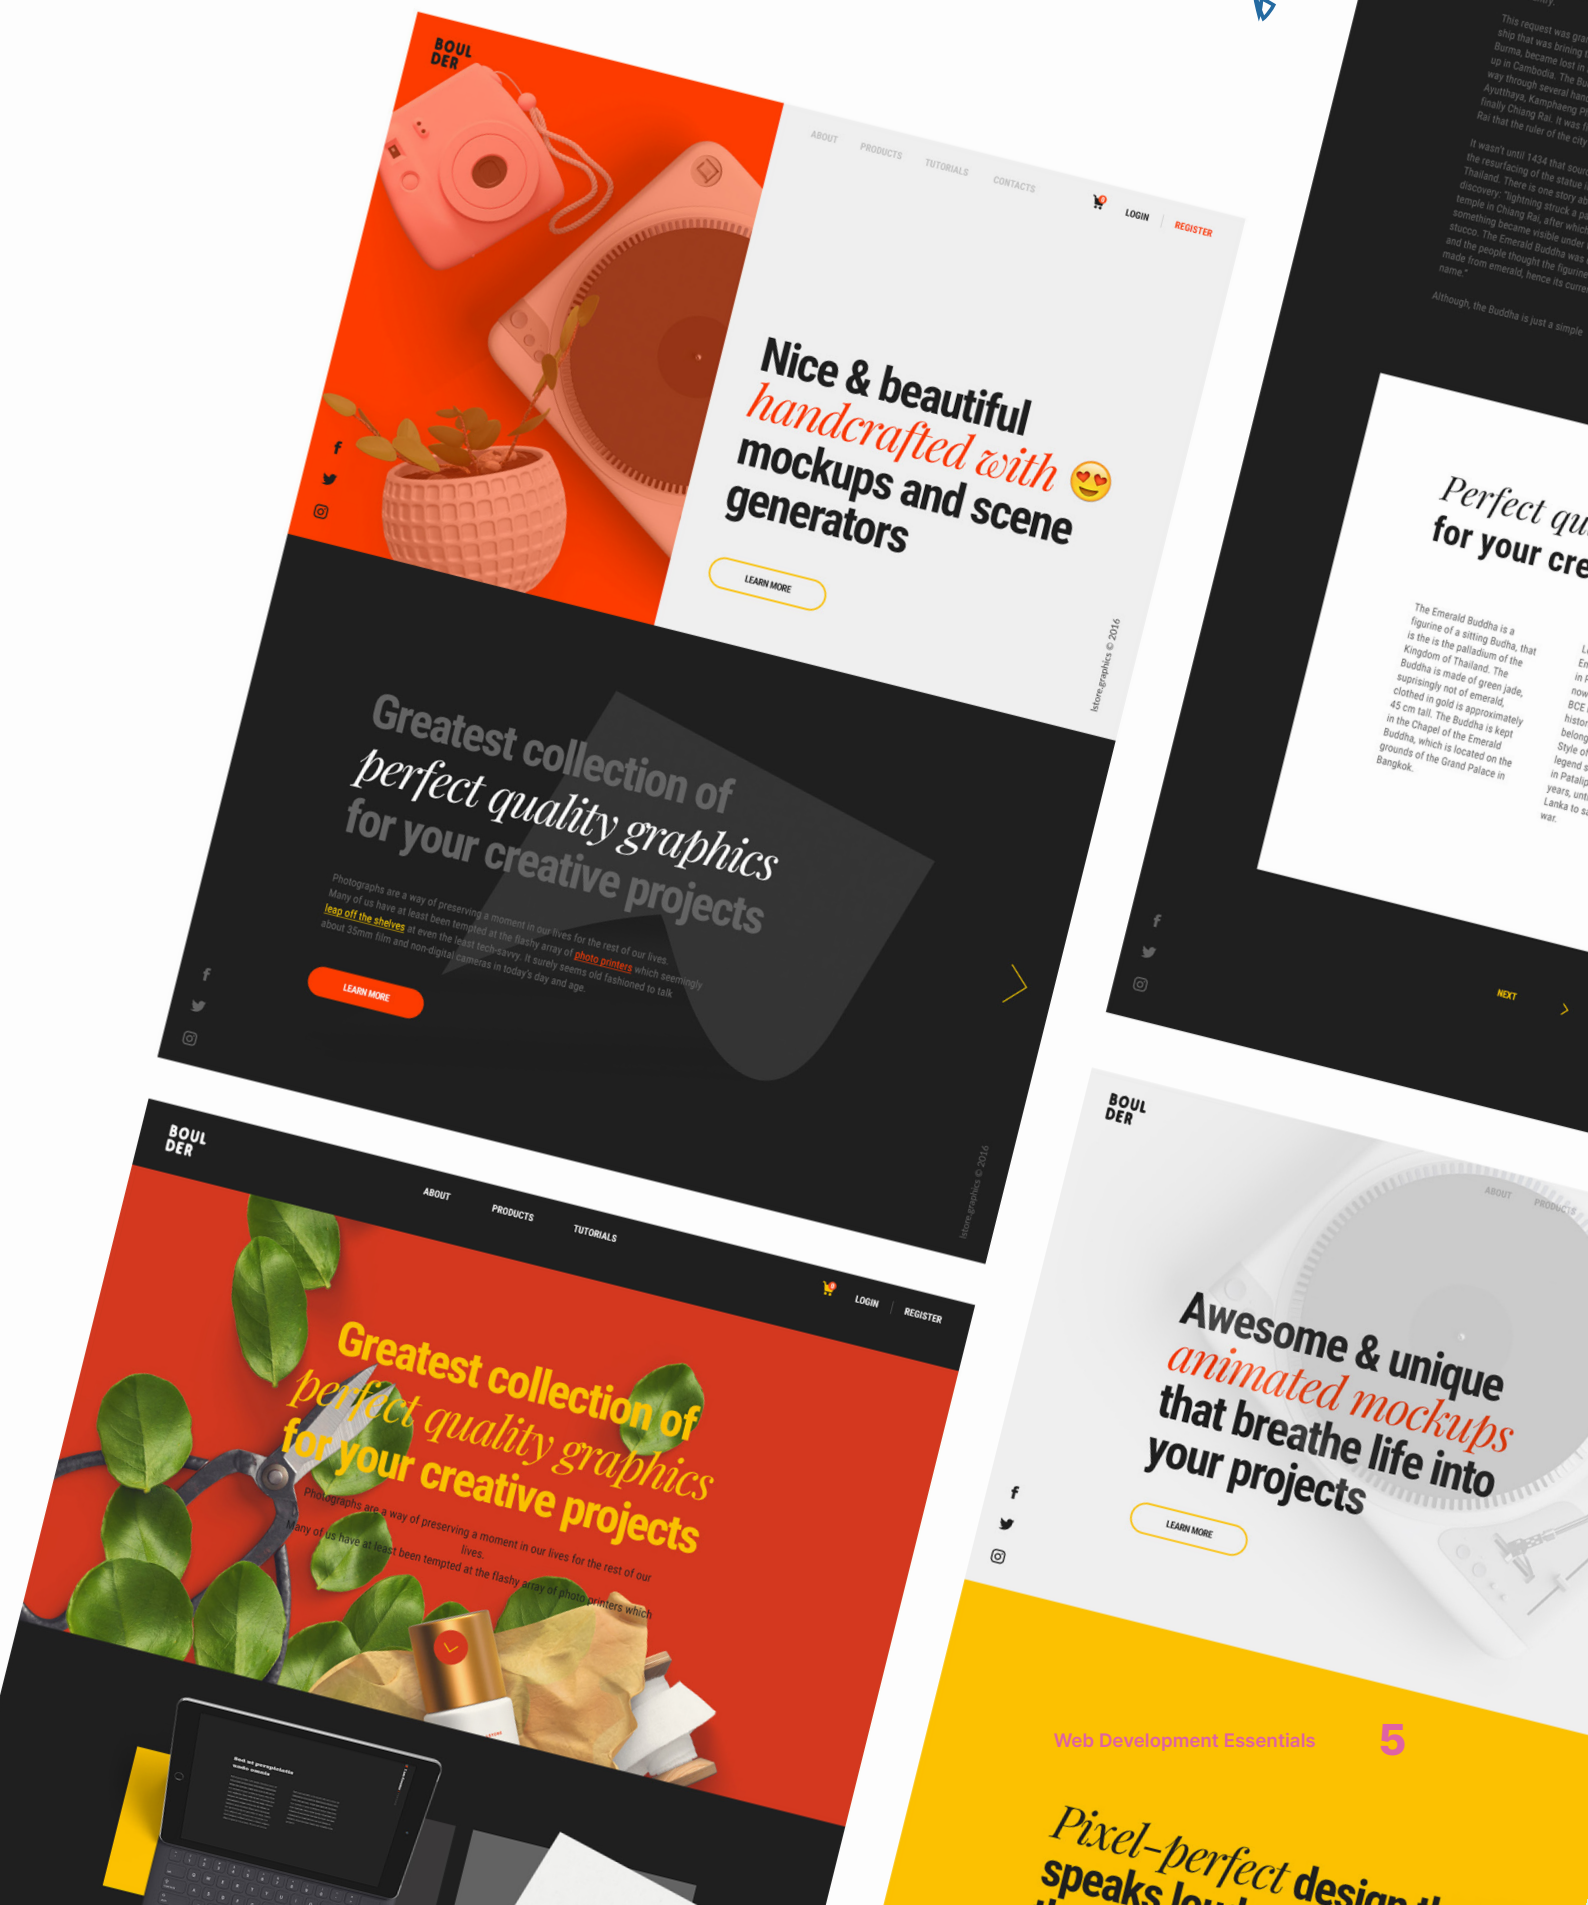
A beginner-friendly course designed by seasoned industry professionals to give you an easy and fun introduction to highly sought after skills in front-end coding languages (HTML, CSS) and programming languages and how to solve common problems using these languages.

Jump into the world of web development and learn about front-end and programming languages from a beginner's perspective in an easy-to-digest and fun format

Learn about front-end languages such as HTML, CSS and JavaScript and practice how to use them in a hands-on way by creating interactive websites

Use programming languages such as JavaScript, Python or PHP to understand what programming is all about and feel confident to use them for your own projects

Create a workable website to suit your brand



Great choice for someone ready to have an exciting career in code.

- Front-end languges such as HTML/CSS and JavaScript frameworks
- Programming fundamentals - using JavaScript or Python or PHP (not sure yet) we will teach the core of what programming is.
- How to solve problems, planning code and working with version control so you never loose your work.

We believe your success is our success

Our instructors are industry experts who have a wide range of professional experience, and up-to-date knowledge of software and workplace practices.

Turn theory into knowledge as you learn to create websites, write HTML, CSS, use Wordpress. Our aim is to support your learning goals with hands-on industry training, career advice, and ongoing support and guidance.

Our classes are intentionally designed to be interactive and practical, so that you feel confident to share ideas as well as independently create your own designs.

You will receive additional resources such as class projects, worksheets, and online help, so you always feel supported and encouraged as you learn.

Our courses are constantly reevaluated and developed to give students the most relevant, up-to-date knowledge and skills. We want you to feel confident and prepared to take your first steps in a new direction—both personally and professionally.

Course outline

Week 1		
Lesson	**Theory**	**Practice**
How front-end languages work	Step-by-step approach to show you the building blocks of languages such as HTML/CSS and JavaScript.	Creating front-end code in HTML/CSS SASS and adding interactivity with JavaScript.

Week 2		
Lesson	**Theory**	**Practice**
Solve problems using code and developer tools	We dive into topics such as Version Control with Git, Responsive Design and Debugging.	Full workshop on how to solve problems using developer tools. A core part of web development.

Week 3		
Lesson	**Theory**	**Practice**
PHP as a Backend Language	Using the immensely popular language of JS and PHP to teach back-end concepts.	Creating a simple content management system.

Week 4		
Lesson	**Theory**	**Practice**
Team-based projects (co-development)	Work on real-world scenarios and solve for a range of commonly occurring problems.	Working in teams to create a project using co-coding techniques.

Our teaching philosophy

We want you to feel confident and prepared to take your first steps in a new direction—both personally and professionally.

Personalised learning system	We design our courses using the 4MAT Model, which approaches learning in a holistic way combining the left-brain and right-brain, so you will learn topics and skills in a unique way that enables you to use them in the real-world with confidence.
Practical	We show you how to use industry-specific tools and programs, so you get lots and lots of practice and feel confident to use them independently.
Real-world applications	Our industry expert instructors are with you every step of the way, providing guidance through problem-solving and sharing valuable real world experiences.
Friendly	Our industry expert instructors create a relaxed and friendly atmosphere, so you feel comfortable, have fun, and enjoy participating.

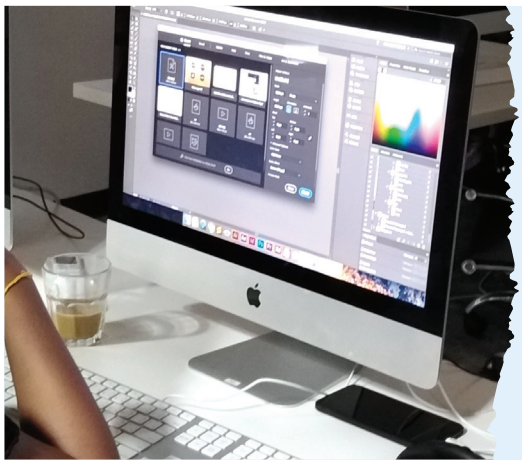
Here's what you'll be able to do after the course!!*

Front-end & programming language

Have a clear understanding of how front-end and programming languages work

Code and developer tools

Feel confident to solve problems using code and developer tools



Team working

Use skills learned such as, coding, on your own work or team-based projects

Payment

Early bird 10% off	Refer a friend
Book and pay 30 days in advance and save 10% off your total	Invite your friends and receive a 500 baht discount per referral - or, book as a group and receive special pricing!

Payment terms

Total price 17,910 **baht**

50% deposit to confirm your place and 50% on the first day of the course.

Payment options

- PayPal
- Credit Card (+3% charges)
- Bank transfer
- Monthly installments (with 0% interest)
- Omise (+3.56 % Chares)
